

Moderna COVID-19 Vaccine Consent and Screening

Patient Name (print): _____

Date of birth: _____ **Age:** _____ (must be 18 or older)

The following questions will help us determine if there is any reason we should not be given the COVID vaccine and or if you will need extra time to be monitored afterward or if further counseling is necessary. If you answer "yes" to any question, it does not necessarily mean you should not be vaccinated.

<u>If yes to #1, observe patient for 30 minutes after vaccination, rather than 15 minutes.</u>	YES	NO
1. Have you ever had a serious or life-threatening allergic reaction, such as hives or difficulty breathing, to any vaccine or shot?	<input type="checkbox"/>	<input type="checkbox"/>

If yes to #2-#11, do not vaccinate today, and have patient consult with a provider.

2. Are you currently sick with a high fever?	<input type="checkbox"/>	<input type="checkbox"/>
3. In the last 10 days, have you had a COVID-19 test or been told by a healthcare provider or health department to isolate or quarantine at home due to COVID-19 infection or exposure?	<input type="checkbox"/>	<input type="checkbox"/>
4. Have you received convalescent plasma or antibody treatment for Covid-19 in the past 90 days?	<input type="checkbox"/>	<input type="checkbox"/>
5. Have you ever had a serious or life-threatening allergic reaction to any of the components of this vaccine or to a prior dose of Covid-19 Vaccine?	<input type="checkbox"/>	<input type="checkbox"/>
6. Do you have an allergy to any of the vaccine components including polyethylene glycol (PEG); an allergy to polysorbate; or did you have an allergic reaction to a previous dose of COVID-19 vaccine?	<input type="checkbox"/>	<input type="checkbox"/>
7. Are you pregnant or considering becoming pregnant?	<input type="checkbox"/>	<input type="checkbox"/>
8. Are you breastfeeding?	<input type="checkbox"/>	<input type="checkbox"/>
9. Have you been vaccinated with any other COVID-19 vaccine (not Moderna), or have you received 2 doses of COVID-19 vaccine already?	<input type="checkbox"/>	<input type="checkbox"/>
10. Do you have cancer, leukemia, HIV/AIDS, or any other immune system problem; or, in the past 3 months, have you taken medications that weaken the immune system, such as cortisone, prednisone, other steroids, or anticancer drugs?	<input type="checkbox"/>	<input type="checkbox"/>
11. Have you had any vaccines in the past 14 days (2 weeks) including flu shot?	<input type="checkbox"/>	<input type="checkbox"/>

I attest to having received information regarding Emergency Use authorization and its difference from full FDA approval. I consent to receive the Moderna vaccine today and verify that the above answers are true.

CONGRATULATIONS ON YOUR MODERNA COVID-19 VACCINE!

1 (800) 300-OMNI (6664) www.OmniFamilyHealth.org

This is your:

- 1st of 2 vaccines; you will return on _____ at _____ in 4 weeks for your 2nd vaccine
- 2nd vaccine; the series is complete and you will reach peak immunity 2 weeks from now

The Moderna COVID-19 Vaccine is an unapproved vaccine that may prevent COVID-19. There is no FDA-approved vaccine to prevent COVID-19. The FDA has authorized the emergency use of the Moderna COVID-19 Vaccine to prevent COVID-19 in individuals 18 years of age and older under an Emergency Use Authorization.

<p>It is normal and good to have a strong immune response to the vaccine! A strong immune response may cause:</p> <ul style="list-style-type: none"> • Pain/ Swelling at the site on the arm where you got the shot • Fever & Chills and Tiredness/ Fatigue • Headache • Vomiting & Diarrhea 	<p>It is NOT normal for the vaccine to cause these symptoms, and they may be signs of Covid-19 infection:</p> <ul style="list-style-type: none"> • Runny/ stuffy nose • Change in taste or smell • Sore throat • Cough or shortness of breath
These symptoms will go away in a few days.	If you have these, STAY HOME and contact your medical provider.

REMINDERS:

- You will need 2 shots in order for this vaccine to work. Get the second shot even if you have symptoms from an immune response after the first one, unless a vaccination provider or your doctor tells you not to get a second shot
- It takes time for your body to build protection after any vaccination. COVID-19 vaccines that require 2 shots may not protect you until a week or two after your second shot.
- It's important for everyone to continue using all the tools available to help stop this pandemic as we learn more about how COVID-19 vaccines work in real-world conditions. Cover your mouth and nose with a mask when around others, stay at least 6 feet away from others, avoid crowds, and wash your hands often.

**Get vaccinated.
Get your smartphone.
Get started with v-safe.**

What is v-safe?

v-safe is a smartphone-based tool that uses text messaging and web surveys to provide personalized health check-ins after you receive a COVID-19 vaccination. Through **v-safe**, you can quickly tell CDC if you have any side effects after getting the COVID-19 vaccine. Depending on your answers, someone from CDC may call to check on you. And **v-safe** will remind you to get your second COVID-19 vaccine dose if you need one.

Your participation in CDC's **v-safe** makes a difference — it helps keep COVID-19 vaccines safe.

How can I participate?

Once you get a COVID-19 vaccine, you can enroll in **v-safe** using your smartphone. Participation is voluntary and you can opt out at any time. You will receive text messages from **v-safe** around 2pm local time. To opt out, simply text "STOP" when **v-safe** sends you a text message. You can also start **v-safe** again by texting "START."

How long do v-safe check-ins last?

During the first week after you get your vaccine, **v-safe** will send you a text message each day to ask how you are doing. Then you will get check-in messages once a week for up to 5 weeks. The questions **v-safe** asks should take less than 5 minutes to answer. If you need a second dose of vaccine, **v-safe** will provide a new 6-week check-in process so you can share your second-dose vaccine experience as well. You'll also receive check-ins 3, 6, and 12 months after your final dose of vaccine.

Is my health information safe?

Yes. Your personal information in **v-safe** is protected so that it stays confidential and private.*

*To the extent **v-safe** uses existing information systems managed by CDC, FDA, and other federal agencies, the systems employ strict security measures appropriate for the data's level of sensitivity. These measures comply, where applicable, with the following federal laws, including the Privacy Act of 1974; standards enacted that are consistent with the Health Insurance Portability and Accountability Act of 1996 (HIPAA); the Federal Information Security Management Act, and the Freedom of Information Act.

Use your smartphone to tell CDC about any side effects after getting the COVID-19 vaccine. You'll also get reminders if you need a second vaccine dose.

How to register and use v-safe

You will need your smartphone and information about the COVID-19 vaccine you received. This information can be found on your vaccination record card; if you cannot find your card, please contact your healthcare provider.

Register

1. Go to the **v-safe** website using one of the two options below:

2. Read the instructions. Click **Get Started**.
3. Enter your name, mobile number, and other requested information. Click **Register**.
4. You will receive a text message with a verification code on your smartphone. Enter the code in **v-safe** and click **Verify**.
5. At the top of the screen, click **Enter your COVID-19 vaccine information**.
6. Select which COVID-19 vaccine you received (found on your vaccination record card; if you cannot find your card, please contact your healthcare provider). Then enter the date you were vaccinated. Click **Next**.
7. Review your vaccine information. If correct, click **Submit**. If not, click **Go Back**.
8. **Congrats! You're all set!** If you complete your registration before 2pm local time, **v-safe** will start your initial health check-in around 2pm that day. If you register after 2pm, **v-safe** will start your initial health check-in immediately after you register—just follow the instructions.

You will receive a reminder text message from **v-safe** when it's time for the next check-in—around 2pm local time. Just click the link in the text message to start the check-in.

Complete a v-safe health check-in

1. When you receive a **v-safe** check-in text message on your smartphone, click the link when ready.
2. Follow the instructions to complete the check-in.

Troubleshooting

How can I come back and finish a check-in later if I'm interrupted?

- Click the link in the text message reminder to restart and complete your check-in.

How do I update my vaccine information after my second COVID-19 vaccine dose?

- **V-safe** will automatically ask you to update your second dose information. Just follow the instructions.
